PROJECTS

Coffee Co | [Link](#)

- Coffee Co Bot - Node.js, GrammyJS, MongoDB VPS Deployment
- Developed and deployed a Telegram bot to automate customer management for Coffee Co, a coffee shop based in Tashkent.
- Implemented a built-in CRM panel for administrators, enabling efficient customer tracking and management.
- Integrated cashback and level-up loyalty systems to improve customer retention and engagement.
- Designed a unified bot experience for both customers and admins, ensuring maximum convenience within a single platform.
- Scaled the system to onboard 300+ registered users shortly after launch, supporting business growth and enhancing customer service.
- Configured and deployed the application on a VPS, including environment setup, database configuration.

IxlosWare Blog Platform | [Link](#)

- IxlosWare Blog Platform — Express.js, MongoDB, TypeORM, React, Telegram Bot, VPS Deployment
- Designed and developed the full backend architecture of a blogging platform, empowering developers in Uzbekistan to share technical posts in the Uzbek language.
- Built and exposed RESTful APIs with **Express.js** and **TypeORM**, leveraging **MongoDB** for efficient and scalable data management.
- Deployed the platform on a **VPS server**, configuring CI/CD workflows, reverse proxy, SSL certificates, and security measures to ensure reliability and protection against cyberattacks.
- Integrated a **Telegram bot** to fully automate the blogging workflow — enabling new posts to be instantly published both on the website and the official Telegram channel, boosting user reach and engagement.
- Designed a seamless system where admins could manage posts from a single dashboard while the bot handled automatic distribution and notifications.
- Successfully scaled the platform to serve **100+ daily active users** from launch, supporting the growth of a local developer community and fostering knowledge sharing

Avtosalon Admin Panel — Express.js, MongoDB, Mongoose, JWT Authentication, VPS Deployment

- Developed a real CRM admin panel for a car dealership in Urganch.
- Implemented secure JWT-based authentication and authorization.
- Built modular RESTful APIs with MongoDB & Mongoose for cars, users, and sales.
- Deployed on VPS with security and performance optimization.
- Automated dealership operations with a user-friendly CRM workflow.
